

**DM-4  
UNIVERSAL DIMMER 1000W**

**ALLER - RETOUR CONNECTION**

**Product description-Operation**

The wall mounting dimmer DM-4 is a 230V a.c./50Hz voltage regulator, specifically designed to fulfill the needs of indoor lighting adjustment and ventilation installations. It is suitable for controlling any type of 230V incandescent bulbs (resistive or halogen lamps), or 12-36V lamps with transformer, ferromagnetic or electronic and motors, up to 1000W.

The device is manufactured in accordance with Directives 2014/35 / EU, 2014/30 / EU and EN 60669-1: 2000, EN60669-2-1: 2002.

**Handling**

The dimmer has a rotary potentiometer with ON/OFF push switch, that allows to adjust the power consumption at the desired point, starting from a lower preset limit to the maximum. It also has a trimmer to set the lower limit.

**Loads**

- Incandescent bulbs
- Halogen lamps
- Dimmable LED bulbs, up to 200 W
- Induction transformers, up to 800 VA  
(Transformers must be charged to at least 60% of their power.)
- Single phase motors

**Technical specifications**

Operating voltage	230 Volts a.c. / 50Hz
Load	3 W - 1000 W
Protection from short circuit / overload	Glass Fuse Tube 5x20mm 5A/250V
Operating temperature	-10 °C to +60 °C
Maximum humidity	95 %
Constraction material	ABS
Dimentionis	80mm x 80mm x 50mm

Made in **Greece**
