

Rail Mounting Light Dimmer DR-1

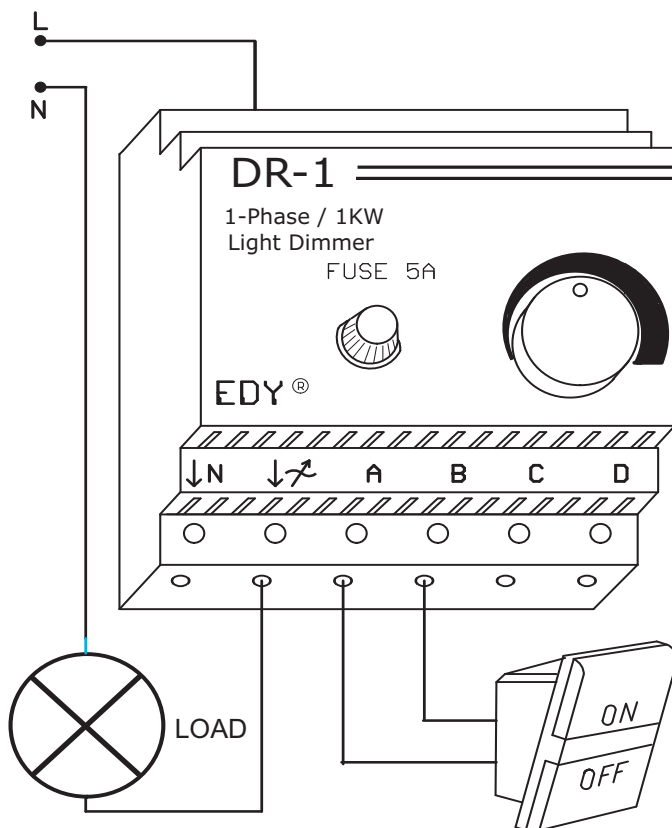

Product Description

DR-1 is a rail mounting dimmer 230V a.c. 3W to 1000W, designed to fulfill the needs of indoor lighting adjustment.

It is suitable for controlling resistive loads (230V incandescent lamps).

It has a potentiometer to adjust the power consumption, at the desired point of the operator from 1% to 100%.

The dimmer is in conformity with provisions of directives and international standards EN 60669- 1: 2000, EN 60669-2-1 : 2002 2014/35/EU, 2014/30/EU.

Connection

The device must be connected by a qualified technician.

It is possible to connect an ON-OFF external switch, to turn ON or OFF the load.

CAUTION: The switch does not isolate the power line, only the drive circuit.

Technical specifications

Operating voltage	230 Volts a.c. / 50Hz
Load	3 W - 1000 W
Protection from short circuit / overload	Glass fuse 5x20mm 5A / 250V
Operating temperature	-10 °C to +60 °C
Maximum humidity	95 %
Construction material	ABS

IP 20

Made in Greece
